
Did you know?

- Even though coral looks like a colorful rock, it is actually a living animal.
- Coral reefs are over 100 million years old. That's really old.
- Coral reefs provide shelter for many underwater animals, including sponges, eels, jellyfish, crabs, shrimp, lobsters and turtles.
- The Great Barrier Reef, located off the coast of Australia, is so big it can be seen from outer space.

Instructions:
Move the red window across the ocean scene to reveal some cool underwater creatures: sea turtle starfish jellyfish stripedfish sea shell.
